OBJECTIVE

Angular Developer with nearly 4 years of experience building scalable, high-performance web applications. Specialized in Angular (up to v17), dynamic form engines, reusable components, and data-driven dashboards. Experienced in translating complex business requirements into clean, user-friendly interfaces, optimizing performance, and collaborating closely with backend and product teams to deliver reliable, production-ready solutions.

EDUCATION

B.Sc - Computer Science

Mohamed Sathak College of Arts
And Science
2018 - 2021

TECHNICAL SKILL

HTML-5 ,CSS3 ,JAVASCRIPT
,TYPESCRIPT ,ANGULAR V17 ,BOOTSTRAP
,Git, SQL ,Performance Optimization

TOOLS

Angular CLI, VS Code, Git, GitHub,
Bitbucket, Postman, Swagger, Chrome
DevTools, PrimeNG, Chart.js, Capacitor,
Jira

PERSONAL PROJECTS

Dynamic Form Builder Platform (In Progress)

Developing a metadata-driven dynamic form creation system using Angular, enabling form generation based on JSON/metadata without code changes. Implemented reusable field components, validation rules, conditional logic, and API-ready persistence patterns. The platform allows users to generate and copy Angular form code after form creation, with a focus on scalable architecture, performance, and clean UI/UX design.

WORK EXPERIENCE

TDIT solution Pvt Ltd

18/06/2025 - present

Designed and enhanced user interfaces for existing Angular applications, implemented API integrations, and improved application performance across multiple modules. Worked extensively on data-driven dashboards, handled production bug fixes, and optimized existing code to ensure stability, scalability, and a smooth user experience in live environments.

Blue Marble Smartware Pvt Ltd

01/11/2021 - 18/06/2025

Built and maintained scalable, responsive web applications using Angular, with strong focus on API integration, performance, and code quality. Converted web applications into mobile apps using Capacitor, collaborated closely with cross-functional teams to implement business requirements, and actively contributed to code reviews, bug fixing, and UI optimization to enhance overall user experience.

PROJECTS

SmartSort - Backoffice Web Application

Worked on the SmartSort Backoffice system for a waste collection platform used in Saudi Arabia. Developed and enhanced Admin, Finance, and Executive modules, focusing on dashboard creation, data visualization, API integration, and performance optimization. Handled production bug fixes, improved existing UI workflows, and supported business-critical operations through stable, scalable front-end implementations.

MDR Mobile App

Developed a health and wellness mobile application using Angular and Capacitor, focused on tracking daily activities and improving user health. Handled complete front-end development, including responsive UI design, state management, and API integration to deliver real-time insights across devices.

Endoc & Endoc Billing

Worked as a front-end developer on medical web applications used by doctors. Served as the sole front-end developer for Endoc Billing, implementing modules for visits, payments, insurance claims, and doctor-coder communication, with a strong focus on usability and seamless API integration.

NPM (Nutrition & Meal Planning Module)

Developed key modules for a nutrition and meal planning system, including meal plan reminders, food and ingredient management, and template-based/manual meal plan creation. Integrated APIs to support accurate macro and micronutrient tracking and personalized dietary workflows.

Achievement & Responsibilities

Optimized application load time by 25% through lazy loading and module splitting. Played a key role in redesigning a legacy application, leading to a 40% increase in user engagement

DECLARATION

I here by declare that the above information is true to the best of my knowledge and belief
